PROFILE SUMMARY

Aspiring Software Engineer with strong foundations in Python, SQL, software testing, debugging, and database management. Hands-on experience in developing, testing, and debugging applications through academic and personal projects. Skilled in analyzing results, identifying issues, performing database checks, and following software development and quality practices to deliver reliable solutions.

EDUCATION

B. Tech in Computer Science and Engineering	2023 - 2026
DVR and Dr. HS MIC College of Technology, Kanchikacherla, AP	CGPA: 8.24 / 10
Diploma in Computer Science Engineering	2020 - 2023
VKR and VNB Polytechnic College, Gudivada, AP	Percentage: 72.98%

TECHNICAL SKILLS

- **Programming:** Python, SQL, JavaScript (Basic), Object-Oriented Programming (OOP), Data Structures and Algorithms, Problem Solving
- **Web Technologies:** HTML5, CSS, React.js, Django REST Framework, REST APIs, Bootstrap
- **Databases:** MySQL, SQLite
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Netlify, Render
- **Software Development:** SDLC, Debugging, Testing, Agile Methodologies, Software Design Principles

PROJECTS

AI-Powered CSV Importer

Tech: Next.js | React.js | TypeScript | Node.js | Express.js | Gemini API | Docker

- Engineered an AI-powered CSV import platform by integrating Google Gemini API, secure REST APIs, and Docker to automate data mapping, validation, and backend processing with improved efficiency.
- Integrated Google Gemini API to automate intelligent column mapping, reducing manual effort and improving data import accuracy.
- Implemented secure REST APIs for file uploads, CSV parsing, validation, and backend processing.
- Containerized the application using Docker while ensuring responsive design, testing, and debugging.

Student Marketplace

Tech: React.js | Django REST Framework | MySQL | REST APIs | JWT Authentication

- Developed a scalable full-stack student marketplace using React.js and Django REST Framework, implementing JWT authentication, REST APIs, and CRUD operations.
- Designed JWT authentication, role-based access control, and REST APIs to manage user accounts, product listings, image uploads, and application data.
- Optimized application performance through deployment, testing, debugging, and API integration to ensure a reliable and scalable user experience.

Campus Connect

Tech: React.js | Django REST Framework | MySQL | REST APIs | Git

- Built a centralized college event management platform using React.js and Django REST Framework with REST APIs and CRUD operations to streamline event management.
- Implemented CRUD operations, secure backend APIs, and responsive interfaces to simplify event creation, registration, and event management workflows.
- Applied SDLC principles, Git version control, testing, and debugging to improve code quality, application reliability, and maintainability.

CERTIFICATIONS

Infosys Springboard : Python, HTML, CSS, JavaScript, Computational Problem Solving

TCS ION : Career Edge - Young Professional

SOFT SKILLS

Problem Solving | Communication | Analytical Thinking | Team Collaboration | Attention to Detail | Adaptability | Initiative | Time Management | Continuous Learning | Ownership
